Remember that the quality of the defenses, hence the quality of the of the school on the labor market depends on you. The remote defences during the Covid crisis allows more flexibility so you can progress into your curriculum, but also brings more risks of cheat, injustice, laziness, that will harm everyone's skills development. We do count on your maturity and wisdom during these remote defenses for the benefits of the entire community.

SCALE FOR PROJECT NETPRACTICE (/PROJECTS/NETPRACTICE)

You should evaluate 1 student in this team

Git repository

git@vogsphere.kzn.21-school.ru:vogsphere/intra-uuid-6e6c9ecd-3a99-46 🖺

Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) whose work is evaluated the possible dysfunctions in their project. Take the time to discuss and debate the problems you may have identified.
- You must consider that there might be some differences in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade them as honestly as possible. The pedagogy is valid only and $% \left\{ \left(1\right) \right\} =\left\{ \left(1$ only if peer-evaluation is conducted seriously.

Guidelines

- Only grade the work that is present in the Git repository of the student or group.
- Double-check that the Git repository belongs to the student or the group. Ensure that the project is the one expected and also check that "git clone" is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something that is not the content of the official repository.
- To avoid any surprises and if applicable, review together the scripts used to facilitate the grading (scripts for testing or automation).
- As an evaluator, if you have not completed the assignment you are going to grade, you then have to read the entire subject prior to starting the defence.
- Use the flags available on this scale to signal an empty repository, a non-functioning program, a norm error, cheating, and so forth. In these cases, the evaluation process ends and the final grade is 0, or -42 in case of cheating. However, except for cheating, student are strongly encouraged to discuss the work that was turned in together, in order to identify any mistakes that shouldn't be repeated in the future.
